Hardware, meet software While Microsoft only makes the software for machines manufactured by Dell, Sony, HP and others, Apple makes the software and the hardware for Mac, ensuring a more seamless user experience.. A touchscreen Mac, that supports the Pencil, that's small and can be used as a tablet? But it's not at all insane to think a future Mac will fuse with the iPad.

It's completely worth the money, and their customer service is renowned In addition, it's incredibly easy to get whatever you have going on looked at, assessed and fixed (or replaced).. 6 Time Machine and the Cloud Too many people don't backup their computer on a regular basis.. 4 Ease of purchase Apple keeps the customer journey simple In other words, whether you go onto Apple's website or into an Apple store, it's relatively easy to select the right Mac for you.. Mac Viewer is not working on my system I am using OS Catalina 10 15, may be because of recent MAC OS Updates, additionally, the recorded videos does not fully compatible with other dashcam viewer (like GPS, map etc). Once you own one Apple device, it gets even easier to own another, because they just work well together.. Yes, you can buy a Windows PC for less up-front, but when you take into account residual value after you sell your device or trade it in, the Mac beats PCs.. Thankfully, Macs make this easy with Time Machine and the Cloud, and are continuously improving these features to make it even more “out of sight, out of mind.. Additionally, when issues arise, there’s only one place to go to get them fixed.. 5 Viruses—or, the lack thereof As Apple grows, the potential for viruses and other security risks do get more likely, but for the most part, Mac users are pretty much living without the threat of viruses, spyware and malware.. If you don’t already own a Mac, it’s time to make the switch Here are our ten reasons for immediate Apple adoption—and not a single one mentions owning one just because they’re “cool” (which, to be honest, they just are):1.. 8 Macs are growing in business and IT Yup, you read that right! More and more businesses are embracing Mac (and needing things like Parallels Mac Management, too.. For a specific customer with very specific needs, yes, this is important—but for a lot of consumers, the process can be confusing.. The only exception to this is perhaps for business-class PCs, which are roughly the same price as a Mac. cea114251b [Logitech Wireless Solar K750 For Mac](#)
